

Custom Hand Built Flight Sim Computers

Need a High End/Powerful Flight Sim Computer? **Moncks Corner Computers** will custom build your PC. We have 20 years of experience in building computers and an enthusiasm in Flight Simulation.

- **Hand built and extensively tested and turnt-in.**
- **Quality components with warranties**
- **Personal touch added to each build including cable management.**
- **Configured for Flight Simulator X**
- **Flight hardware Installed and configured (yoke,throttles,rudder pedals etc)**

Your custom made computer is tested and benchmarked for CPU and memory stability for a MINIMUM of 3-5 days. When these tests are passed to perfection ***Flight Simulator*** is then installed. VERY extensively tested and tweaked to give you the smoothest Flight Sim experience available. Customers are informed of ALL tests along the way and are sent updates and test/benchmark results before the computer is shipped/delivered.

COMPONENTS used are highest quality parts. These are not the CHEAP all-in-one type computer components found in the over counter retail computers. We use only quality tested electronic components.

WARRANTY. Most components have a minimum of 1 year warranty and in most cases have a 2-5 year warranty.

We are Flight Sim enthusiast (with 10 hrs logged toward PPL) and have been using and tweaking flight sim for over 10 years. We can build you a Flight Sim computer tailored to run Microsoft Flight Simulator X with all the hardware. We Tune and Tweak to achieve the best FPS as possible.

**LET AN EXPERT BUILD YOUR NEXT
FLIGHT SIMULATOR!**
